Professional Summary

Tech Lead with **8+ years at Amazon and Microsoft**, leading **agentic AI platforms, large-scale distributed systems, and cloud-native infrastructure at global scale**. Experienced in **LLM Agents, MCP/tooling systems, data/ML platforms, personalization, A/B experimentation, and production systems** serving billions of user interactions. Trilingual in English, Chinese, Japanese.

Work Experience

- **Software Development Manager at Amazon Ads, Seattle HQ** May 2025 - Present
 - o Lead Brand Intelligence to build the foundational platform with multi-agents, MCP tools, data platforms, fine-tuned Small Language Models(Gemma-4, Qwen3), and evaluation framework for over 1 million brands knowledge to power Amazon Sponsored Ads, conversational shopping, and stores.
 - o Own 40+ microservices and data platforms/pipelines. Manage a team of 15 Software Engineers and Applied Scientists. Collaborate with Products, Applied Scientist, and engineering teams to deliver brand storytelling, conversational experience with brand personality, Sponsored Product auction using LLMs.
 - o Defined 3-year technical roadmap, project priority, and execution for driving personalization and dynamic applications.
- **Senior Software Development Engineer at Amazon, Seattle HQ** December 2022 - May 2025
 - o Engineering tech lead for Brand Stores and Brand Follow programs, serving 9 billions+ monthly visits over 2 million stores and 40 millions+ followers. The rendering engines and backend service can handle 25k+ shopper requests per second.
 - o Led store re-architecture to power dynamic experience in real-time. Developed recommendation strategy service to enable store personalization with customer understanding engine. Brand Follow internationalization in 13 countries.
 - o Led 30+ A/B experiments as bar raiser for Sponsored Ads and Creative X. Conducted Bayesian statistical analysis of purchase conversion, Ads revenue, and long-term contribution profit to drive experiment launch decisions.
 - o Launched Dynamic Store landing page, frequently bought together/complementary product recommendations, product re-ranking on Brand Stores. Launched deal push notification on mobile application and recommended brands to follow on Amazon Homepage.
 - o Mentored junior software engineers and interns. Active interviewer for software development engineer hiring since 2021.
- **Software Development Engineer II at Amazon, Seattle HQ** August 2020 - November 2022
 - o Founding member of Brand Follow. Building services on Lambda, ECS + EC2 to scale for ~6k+ requests/sec.
 - o Developed sourcing in PySpark AWS Glue with applied scientists for brand recommendations propensity model and branded deals push notification.
 - o Developed 10+ microservices in Java, Scala, and Python on AWS services. Experience in Typescript, SQL/NoSQL, and Ruby.
- **Engineering Service Engineer at Microsoft, Redmond campus** March 2018 - July 2020
 - o Designed DataBricks/Azure Data Factory with Spark jobs and CI/CD pipelines for large-scale threat modeling.
 - o Built auto-recovery system, and Infrastructure As Code(IaC) for reliable production services in Azure.
- **Global Products Development Software Engineer Internship at ADP** May - August 2017
 - o Front-end development(AngularJS): Integrated Google Analytics to track real-time user behaviors on websites, client/workload distributions. Generated data analysis report.
 - o Back-end development(Spring Framework/Spring Boot): Modernized backend Data Bridge project to Spring Boot.

Work Authorization

- US permanent resident. No sponsorship needed.

Education

Master in **Computer Science** - Georgia Institute of Technology, Atlanta, GA

August 2016 - December 2017

Bachelor in **Computer Science and Core Mathematics** - Purdue University, West Lafayette

August 2012 - May 2016

Core Technical Skills

AI / ML / Agentic Systems: LLM agents, agentic design patterns, MCP servers, tool orchestration, applied AI/ML, personalization, ranking and recommendation systems, A/B experimentation, PyTorch, Scikit-learn

Cloud & Distributed Systems: AWS Bedrock, AgentCore, SageMaker, Lambda, ECS/EC2, Step Functions, Glue, EMR, DynamoDB, S3, OpenSearch, CloudWatch, CDK + Cloud Formation; Azure (Data Factory, Databricks, Service Fabric, Cosmos DB); microservices, real-time serving, event-driven architecture, scalable distributed systems

Data Engineering & Analytics: Spark, PySpark, SQL/NoSQL, AWS Glue, EMR, data pipelines, A/B Test analysis, Google Analytics

Leadership & Engineering Practices: Technical roadmap, engineering strategy, architecture review, operational excellence, cross-functional execution, mentoring, hiring/interviewing, CI/CD, infrastructure as code.
